Our school aims

Our ambition is for every child to access high quality learning experiences, which encourage them to be academically successful, happy, confident and enquiring young people. Every child has the potential to make a difference in the world, to be ambitious in their career choices, and to understand their place in society. These aims, and our school values, underpin our curriculum design and the opportunities we offer both within and beyond the curriculum model.

This document gives an overview of our curriculum content and design: for more information on specific subjects and what is taught, please refer to the section called 'Faculties' on our website (under the 'Students/Parents' tab).

Aims of our curriculum: *Visible success for all individuals through a challenging, evolving curriculum*

The curriculum is carefully designed to be ambitious for all students at John Mason School. We believe that a curriculum should be coherent, well-sequenced and knowledge-rich. We want our curriculum to ensure that no student is denied access to powerful knowledge that can support them to be academically successful, happy, confident and enquiring young people.

It is designed to be constantly evolving and to ensure it challenges students to attain academic success, alongside building the global awareness to develop into educated, empowered citizens. When working on the curriculum we carefully consider "what might be missing" and what our curriculum might address. This means that we review the curriculum regularly to ensure we are always identifying and considering new topics, themes and skills that will support our students as they move into the world beyond school.

Our curriculum offers a wide breadth of academic subjects, alongside the development of essential skills that help our students grow to become confident, independent individuals and excellent communicators.

We aim for our curriculum to provide continuity and progression and takes individual differences into account. A wide range of additional opportunities for learning and personal development enriches the curriculum. The range of subjects and courses supports students in acquiring knowledge, understanding and skills in all aspects of their education.

When designing the curriculum we follow the key principles:

- To ensure our students have access to the powerful knowledge that gives them the best opportunities in later life and is underpinned by our belief in the limitless potential of our students.
- To build on students' previous learning and provide stretch and challenge for our learners.
- To provide for the particular needs and aspirations of students, as well as offering a basic entitlement to broad areas of experience.
- To help students develop a social and moral awareness and an understanding of their responsibilities towards themselves, others and the environment.
- To encourage the attitudes and qualities which will lead students to pursue their learning beyond school, and be happy, safe and successful in their adult life.

Our curriculum aims link directly to our school values: Proud of our creativity; Passionate about learning; Keen to inspire; Valuing ourselves and each other; Determined to be the best that we can be

Enrichment and Extra-Curricular Opportunities

The curriculum is enriched by a range of extra-curricular clubs, trips and activities. A broad spectrum of sporting, musical, creative, scientific and other activities are offered at various points throughout the year.

In KS3 students participate in a range of extra-curricular days such as Charter Day, Careers Day and Keeping Safe Day. These days are spent off timetable exploring some key aspects of their future steps. In addition to this our KS3 students are offered a residential to our very own Welsh Farm towards the end of Year 8 and a work experience expo during year 9.

All students are offered the opportunity to participate in the Duke of Edinburgh Award in Years 10, 11 and 12, and to support this we provide opportunities for students to learn new skills, take part in volunteering, and participate in expeditions, for which they are fully trained and supported. Students work towards bronze and silver award in Years 10 and 11, and the gold award in Year 12.

Key Stage 3 (Years 7-8)

During Key Stage 3, students experience and develop skills and knowledge across a wide range of subjects and opportunities. Our aim is that during Key Stage 3, students should discover what they are interested in and what their individual skills and talents are, as well as gaining the necessary skills, knowledge and attitudes to be happy and successful throughout their five or seven years with us. Schemes of Learning are designed to build on KS2 and to prepare students for KS4, providing the appropriate level of support and challenge for all.

All students follow the National Curriculum, which consists of the core subjects of English, Maths and Science together with the foundation subjects of Art, Drama, Music, PE, Design and Technology (including Textiles, 3D design, Food and Nutrition and Graphics), Geography, History and Religious Studies. In KS3, all students study a modern foreign language - either Spanish, German, French or Mandarin. In Year 8, most students also take up a second language.

In Year 7 and 8, students are taught in form groups or other mixed ability groupings for the majority of their lessons. Maths is taught in sets which are determined by the knowledge and understanding the students currently have in order to support the mastery approach in the teaching. All students

are regularly assessed and supported, to ensure that they are in the right set. In Modern Foreign Languages, students are grouped according to the language they have chosen after the cycle of taster lessons at the beginning of Year 7.

PSHCE is delivered through a course called Character Education. The course covers careers information, citizenship, well-being and sex and relationships related education, as well as financial awareness and enterprise. These subjects are linked together in one subject area, because they are about helping young people embrace change, feel positive about who they are and enjoy healthy, self-responsible and fulfilled lives. The course encourages students to recognise risk, take increasing responsibility for themselves, their choices and their behaviours, and make a positive contribution to their families, school and community. They also are guided to reflect on their learning and their ambitions, and receive information on possible future pathways.

Key Stage 4 (Years 9,10 and 11)

During Key Stage 4, students follow courses in the core subjects of English, English Literature, Mathematics, and Character Education. All students also study Statistics and single Sciences: separate GCSE exams in Physics, Chemistry and Biology.

In addition, students follow a number of options chosen from a wide range of subjects. This year the choices include: History; Geography; Psychology; French; German; Spanish; Mandarin; Computer Science; ICT; Music; Performing Arts; Physical Education; Business Studies; Art; Textiles; Graphics, 3D Design and Health and Social Care. Some students also study for The Prince's Trust qualification. A number of our students in Years 10 and 11 are enrolled onto vocational courses at Abingdon and Witney College or the City of Oxford College. Currently these include: Equine Studies; Hair and Beauty; Motor Vehicle Studies and Construction.

The majority of students take four option subjects; students on college courses take two or three options; students who need more time for study may take three options and have extra time to catch up in the fourth option block.

We review the subjects offered every year to meet the needs and aspirations of our students.

Key Stage 5: Level 3 Courses in the Sixth Form

In the sixth form, students have a wide range of Level 3 subjects to choose from. The majority of our students study three A level subjects, but some are studying four or five. A common timetable structure across Abingdon allows students to access some courses at Abingdon and Witney College (this year the college is offering to our students courses in Engineering, Health and Social Care and Applied Science) and A level subjects taught across JMF6 which might include teaching at Fitzharrys as well as at John Mason School. Sixth form students' enrichment programme includes 'Futures' (a course which delivers careers advice, advice on applications to university, college or apprenticeships, PSHCE, well-being, financial awareness, citizenship and study skills) and a rich programme of enrichment, leading to Duke of Edinburgh Gold award. The Duke of Edinburgh Award programme involves sports and/or fitness, voluntary service, and a programme of enrichment activities. Training for expeditions is scheduled as part of the curriculum provision. The majority of our students also study for the Extended Project Qualification (EPQ) which allows students to research into an area they are interested in, giving research skills, essay writing skills and presentation skills. This also supports University and Apprenticeship applications.

Assessment

Throughout all key stages, students are assessed regularly to monitor progress and help them and their teachers set targets for further improvement. A student's performance is reported home

between three times a year. Formal national examinations are taken at the end of a GCSE course; this is in Year 11 for most courses. A level courses are examined at the end of Year 13. In addition, students will have a number of internal exams throughout each key stage.
